

Mateusz Wilk

Senior Web Developer w BBC

matewilk@gmail.com

Summary

Over my studies on Faculty of Electrical, Electronic, Computer and Control Engineering I have been using many different languages but when I have developed my first Single Site Application in 2008 I fell in love with Web Development. Since then I have gained solid experience building large business web applications using open source languages like JavaScript, php, and Sql. During my 5+ years of professional work I have been using many MVC based frameworks like Zend, Symfony, ExtJs, Backbone.js libraries – jQuery, Raphael, Smarty, LESS and others. Tools like Git, SVG, DbDesigner, WebStorm and many others used in developing modern javascript, HTML5 OOP solutions. I am working in agile methodology keeping high quality standards even in requirements changing environment. Always keeping-up to up to date trends in web development.

Experience

Senior Web Developer at BBC

grudzień 2015 - Obecnie (3 mies.)

Web Developer at BBC

marzec 2014 - grudzień 2015 (1 rok 10 mies.)

Javascript - Backbone.js, Node.js, React.js CSS3 - Sass, Bootstrap, Angular-Material TDD - Jasmine, Mocha, Sinon, Chai BDD - Behat, Continuous Integration - Hudson, Heroku, AWS, Jenkins Yeoman, Bower, Grunt, Vagrant, Selenium, Require.js, Webpack

Software Developer at Arbor Education Partners

lipiec 2013 - luty 2014 (8 mies.)

Web/Javascript Developer at Focus Telecom Polska Sp. z o.o.

wrzesień 2010 - lipiec 2013 (2 lata 11 mies.)

- Development, modifications and new functionality implementation in Javascript based CRM system (features of CRM system could be seen at : <http://www.focustelecom.pl/en/oferta/virtual-crm/>) - front-end components implementation (creation of ExtJs components extensions) - user interface design - usability design - front-end wizards for system modules design and implementation - data presentation in charts (ExtJs) - GUI implementation (forms, controls, grids, panels with custom layouts, combobox templates, custom data views etc.) - Application architecture implementation - Back-end implementation (also SQL)
